

# Finding the missing side in perimeter.

$10 - 4 = 6$ . We can work this out as 6cm.

The top length is 10 cm  
So this whole length is 10 cm.  
We know about 4 cm.  
Therefore  $10 - 4 = 6$

We need to add the lengths up.  
However one length is missing. We  
can work it out!
